Dr Safaa El Medoza appointed that is better to have the course in plenty of time in order to permit to compare to existing courses in Egypt and Lebanon

The same for monitoring procedures (defining of what will be monitored)

Dr Rami Abbas proposed to think, during the courses design, about interdisciplinary courses too.

Dr Ahmad specified that they as Healthcare consulting deal with business plans and monitoring and expressed their willingness to participate actively and their willingness to be involved in the whole process.

Dr Safaa El Mendoza asked if it is possible to have in advance the examples of such documents as business plan – low rules etc.
